Sagrada Familia
Quick Facts
Architect: Antoni Gaudi
Location: Barcelona, Spain
Status: Construction still in progress, Gaudi took over the project starting in 1883.
Style: Spanish Gothic / Neo-Gothic
The Basilica
Sagrada Familia is a Basilica designed by renowned architect Antoni Gaudi located in Barcelona, Spain. It is considered to be an ingenious work of architecture: revolutionizing what buildings are meant to be.
"In his work titled Gaudi, David Weaver quotes the renowned architect Leon Sullivan called Sagrada Familia the greatest piece of creative architecture and a spirit symbolized in stone. It Results in no other building or structure, in the world, to a scale—in the presentation of solid mass in organic form more perfectly delivered. More than just a basilica, the Sagrada Familia is in every sense a living, breathing concrete revelation." [Source]
The Architect
"Antoni Gaudi has become a universal figure in modern architecture. His contribution to this end cannot be, in any way, underestimated. He has never before seen building and structural systems. He created his own unique, unprecedented architecture. He was a man who was obsessed with the utmost care in every detail, showing his love of urban trees." [Source]
Legacy
"In 1968, ascension of his works were declared Artistic/Historical Monuments of Cultural Interest by the Spanish Ministry of Culture."
